

# Amin Toufani

Amin is the CEO of T Labs and the creator of Adaptability.org. He is known for his pioneering work on developing the world's first scientific quantification of adaptability in individuals and organizations called the Adaptability Quotient (AQ).

Amin has lectured in 35 countries and advised 10 governments on his economic framework called Exonomics™ (Exponential Economics & Exponential Business Models) which offers predictive models for the impact of accelerating technologies on individuals, organizations, and societies. He is a parallel entrepreneur, leading projects at T Labs in AI, blockchain, human longevity, quantitative finance, cognitive performance, and Zeromics (stage zero disease diagnostics).

Amin has degrees in artificial intelligence, economic policy, and an MBA. He pursued and received graduate degrees from Harvard and Stanford at the same time.
