Hod
Lipson

Hod Lipson is a roboticist and author who works in the areas of robotics and artificial intelligence. He and his students love designing and building robots that do what you'd least expect robots to do: Self replicate, self-reflect, ask questions, and even be creative.

An award-winning researcher, teacher, and author, Lipson enjoys sharing the beauty of robotics though his books, essays, public lectures, and radio and television appearances. Hod is a professor of Mechanical Engineering and Data Science at Columbia University, where he directs the Creative Machines Lab, which pioneers new ways to make machines that create, and machines that are creative.

Hod Lipson is a frequent keynoter in both industry and academic events. He speaks about artificial intelligence and robotics, and their implications across sectors ranging from retail to finance, and from art to architecture. Clients include Deloitte, Goldman Sachs, Moody, PWC, Google, Exxon, Baidu, Tencent, Citibank, Credit Swiss, Deutsche Telekom, and many others. He also speaks at non-profits such as TED, National Academies, ACM and others.
