

# Jason Dunn

Jason Dunn is an international pioneer in the fields of commercial space, digital manufacturing, and disruptive technologies. In 2014 he was recognized by Forbes on the prestigious “30 Under 30” list.

Jason is the Co-Founder of Made In Space, Inc. (MIS), which is best known for being the first organization to manufacture off Earth. Since conception, MIS has led the aerospace industry in leveraging space manufacturing technology to enable new space missions. Made In Space had a successful exit in May 2020, marking one of the first commercial space start-ups to reach this achievement.

Dunn believes that to solve the worlds biggest problems we must break free from the limits to growth found on our finite planet and move humanity’s footprint into space.
