Marc Goodman

Marc Goodman is one of the world's leading authorities on global security and author of Future Crimes: Inside the Digital Underground and the Battle for Our Connected World — selected by the Washington Post as one of the 10 Best Books of 2015 and by Amazon.com as the best book of 2015 in Business & Investing. He has addressed audiences around the world, including: TED Global, The Economist's Ideas Forum, Google Zeitgeist, Wired Magazine's Forum, and the INTERPOL General Assembly. He frequently advises industry leaders, security executives and global policy makers on the risks and opportunities of emerging technologies and has operated in more than 70 countries around the world.

In his talks, Marc Goodman answers key questions for business, government, healthcare organizations, financial institutions, NGOs, and individuals concerned about digital security. An engaging and entertaining speaker, Goodman provides a call to action for better security measures worldwide and empowers audiences with the education and tools to protect against these technological risks at both the corporate and personal level. Goodman's TED talk on "A Vision of Crimes in the Future," has been viewed nearly 1 million times and was selected by TED as one of the top two talks of 2012 to "freak-out" the TED community.

Goodman founded the Future Crimes Institute to inspire and educate others on the security and risk implications of newly emerging technologies. He also serves as the Global Security Advisor and Chair for Policy and Law at Silicon Valley's Singularity University, a NASA and Google sponsored educational venture dedicated to using advanced science and technology to address humanity's biggest challenges. Goodman's current areas of research include the security implications of exponential technologies such as robotics, artificial intelligence, big data, synthetic biology, virtual worlds, genetics, the Internet of Things, and location-based services. He also offers a popular e-course on digital privacy through Creative Live.

Over the past twenty years Marc Goodman has built his expertise in next generation security threats such as cyber crime, cyber terrorism and information warfare through work with INTERPOL, the United Nations, NATO, the Los Angeles Police Department and the U.S. Government. For over a decade, Goodman trained numerous expert working groups on technological security threats while serving as a Senior Advisor to INTERPOL's Steering Committee on Information Technology Crime. He has worked with various UN entities and was asked by the Secretary General of the United Nations International Telecommunications Union (ITU) to join his High Level Experts Group on Global Cybersecurity.

Marc Goodman's articles have been published by the Harvard Business Review, The Atlantic, Forbes, The Economist, Wired, Harvard Journal of Law & Technology, Jane's Intelligence Review, and the American Bar Association, among many others. He holds a Master of Public Administration from Harvard University and a Master of Science in the Management of Information Systems from the London School of Economics.
